

From expert responses to a shared claim set

Round 1 responses → Extracted claims → Grouped claims for round 2

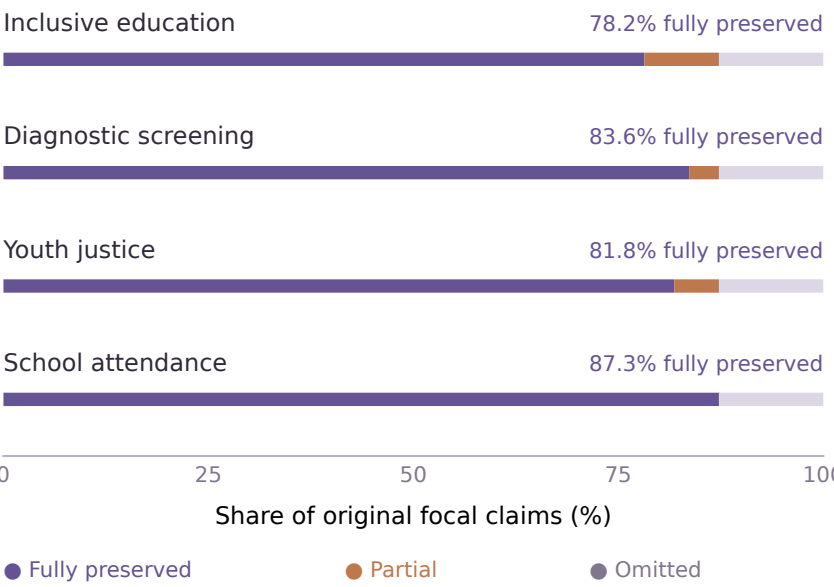

a Responses → final claim set

ILLUSTRATIVE

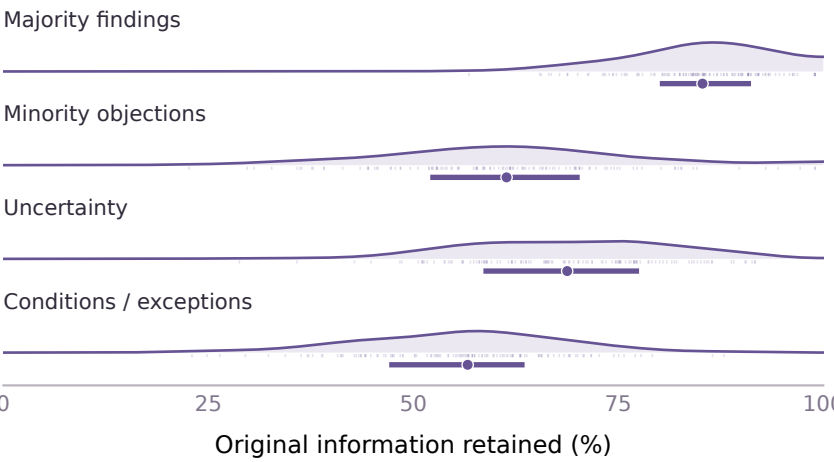

b How much meaning survives?

SAVED PILOT · UNBLINDED SELF-REVIEW

c Which information is lost?

ILLUSTRATIVE · INFORMATION TYPES

a 320 simulated consultations; contours show density, not uncertainty. b Six panels and 55 focal-claim occurrences per scenario.
c 120 separate simulated cases per type; dot and line show median and middle 50%. Panels do not share a measured cohort.

Grouping-only comparison: hold extracted claims fixed and score their grouped version. Separate stage outputs are not available in this pilot.

The eight-claim cap accounts for all 28 pilot omissions. No grouping-specific score is inferred; illustrative panels remain design examples.
