

Where does meaning disappear?

24 two-response panels · 4 synthetic scenarios · 192 assistant-authored extractions

b Follow the meaning through the stages

c What happened to the 220 original focal-claim occurrences?

82.7% fully preserved + 4.5% partially preserved + 12.7% omitted (rounding applies)

Partial = the main point survives, but a consequential qualification or stance changes. Omitted = no extracted counterpart.

The eight-claim cap accounts for the 28 omissions. Grouping fidelity and losses by argument type have not been scored.

PROVISIONAL SELF-REVIEW. Four synthetic scenarios, 24 two-response panels, one assistant conversation; visible reference IDs.

These are assistant outputs, not Symphonia model calls. Grouping must be assessed against original meanings, not the number of output cards.
