

The shape of information loss

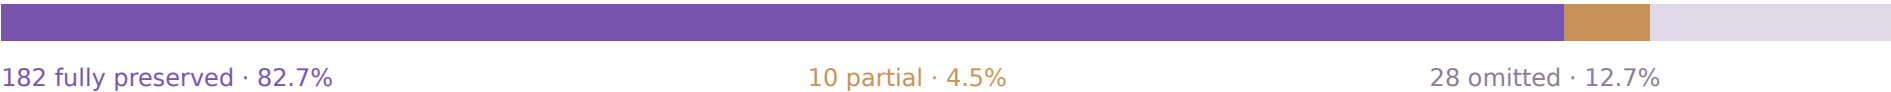

24 source panels / 48 responses / 220 focal-claim occurrences

a Coverage × faithfulness

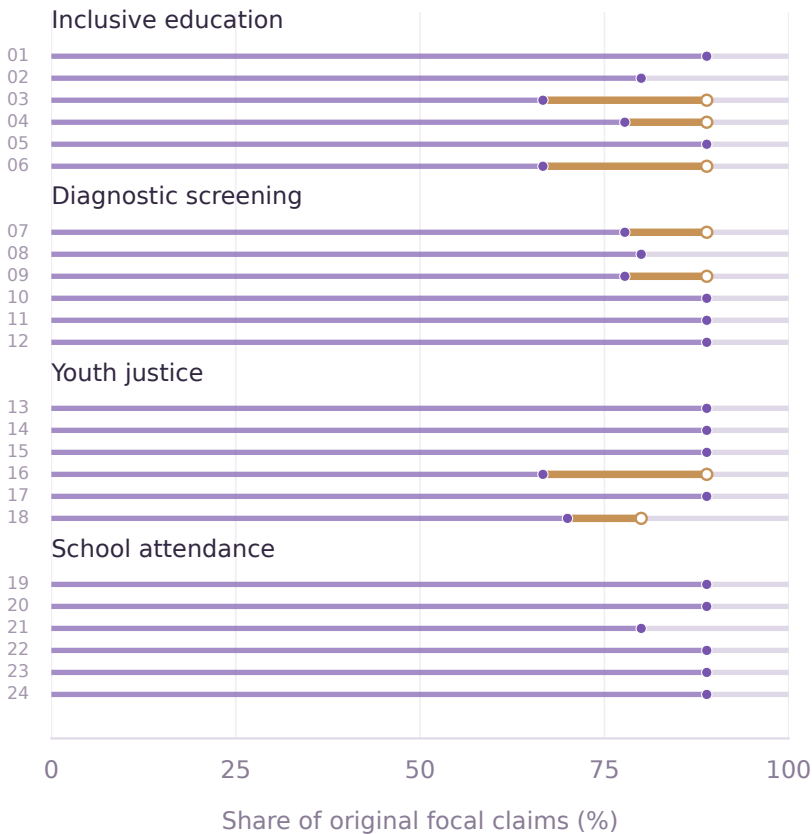

Circle area and numeral count panels at identical scores.
Dotted tracks reflect the eight-claim output cap.

c Across all 220 focal-claim occurrences

Assistant-authored synthetic pilot · unblinded self-review · four scenarios, not 24 independent studies.
The eight-claim cap accounts for all 28 omissions. Grouping loss was not separately measured.

b What survives in each panel?

One line per panel; grey = no extracted counterpart.
Filled point: fully preserved. Open point: including partial.
