

Faithfulness does not guarantee coverage

Assistant extraction pilot · 24 panels across four synthetic scenarios

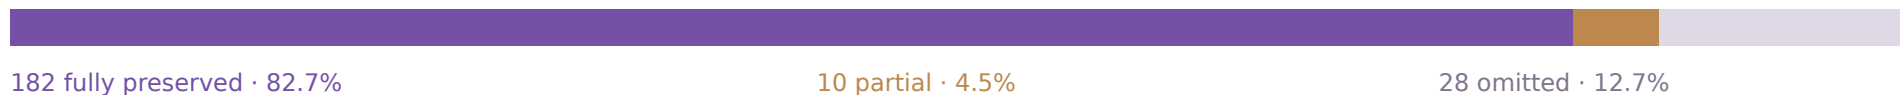

a Coverage × faithfulness

Coverage: source claims fully preserved / original claims.

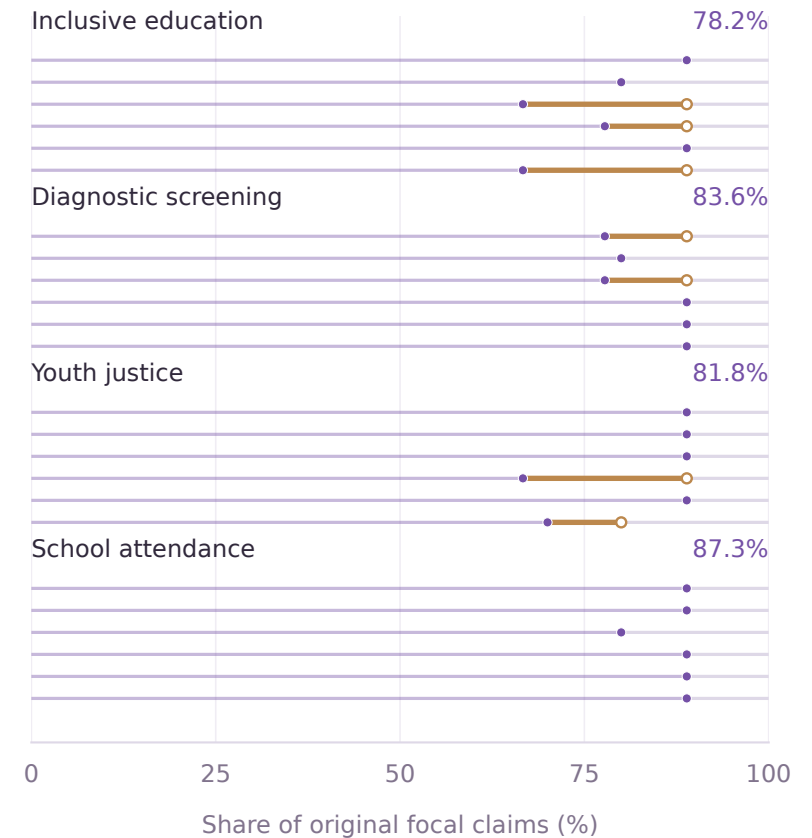

Faithfulness: fully supported claims / extracted claims.

c Source information retained, weakened or omitted

220 original focal-claim occurrences · 192 extracted claims · provisional unblinded self-review.
The eight-claim cap accounts for all 28 omissions. Grouping loss was not separately measured.

b Retention across scenarios

Six panels per scenario; headings give pooled coverage.

Filled: fully preserved. Open: including partial preservation.
